

NEW CONSTRUCTION

Evergreen Court, Kildeer

This home captures the essence of the Kildeer area and lifestyle situated on over an acre of property with mature trees and long vistas of open space.

This was designed and constructed by a local award-winning firm with extensive experience matching homes to their building sites. The 5,380-square-foot home, plus 1,815 square-feet of basement area, has many features typically only found in much larger homes. From the raised stone terrace and cedar pergola on the exterior to the extensive master suite and multiple laundry rooms on the interior, this is one well thought out home for all types of families and lifestyles.

The kitchen is open to a panoramic full glass nook area. This is adjacent to "her" office which organizes the daily paperwork and electronic devices. The kitchen is driven by a complete line of Wolf and Sub-Zero products. These are accompanied by a large walk-in pantry. All this functionality is enhanced by award-winning Wood-Mode cabinetry and granite counters.

This is truly a home for all to enjoy. The oversized rooms, rear stair, English basement and extra garage space will compliment any growing family to move down clients. Come see why we have been fulfilling dreams for nearly 20 years in the area.
