

NEW CONSTRUCTION

Prairie Lakes, Saint Charles

From the massive stone turreted exterior to the towering pitches of the cedar shake roof, this 10,000 square foot home is exuding with an ambiance fit for a castle. The exterior features a magnificent two story stone turret, which houses the circular custom ironed staircase, brick accents, which are impacted throughout and a luxurious lakeside property. Exclusively landscaped to suit this home's exterior, we utilize the highest quality plant materials, natural stone details, paver walks and patios and situated them into an impressive design.

Upon entering this home, the mood is set by the 10 ft. tall iron doors. The foyer features a spectacular circular staircase which curves up the large turret. Underfoot you will find hand hewn hickory flooring. The great room displays a magnificent wall of windows overlooking the serene lake, a two story limestone fireplace and a romantic Juliette balcony, which adorns from above with custom iron panels.

The connoisseur's kitchen, adjacent to the inviting hearth room, features state of the art, integrated appliances, double islands, custom multi-stained cabinetry, pantry and granite counter tops. The adjoining dinette area leads to the custom designed deck, which overlooks the rear property and lake.

The study is a perfect fit – masculine trim details, masonry fireplace and rich stain colors help to complete this room. A private guest suite is also featured on the first floor with its own private onyx and marbled bath.

The second floor, also covered in hand-hewn hickory, features four additional bedrooms. The unique master suite features a private fireplace, breakfast bar, coffered ceiling and an enormous walk-in closet. Natural marble, onyx and metal accents cover the master bath suite. Accompanied by a large whirlpool tub, a custom tiled shower and detailed cabinetry, this master suite is fit for a king.

Following the circular staircase down to the lower level, you will be delighted to discover a basement like no other. This secluded floor has been designed with tranquility in mind. From the organic furnishings to the detailed trim, we have created a spa-like atmosphere that will remove you from everyday life. Complete with an extensive bar, private theater room and guest suite, this level can go from a tranquil resort to a lively lounge.

Built-in nooks, custom detailed trim, unique window treatments, faux wall finishing and fine custom furniture add to the overall splendor of this home.
